Not to scale; seen from the front right and above, about 30 deg elevation

KEY DIMENSIONS AND INTERFACES (MM)

Bench 900 x 450, 755 tall above the lab table
Deck top 32; canopy underside 602; duct 100 ID
Energy flows left to right: supply, water, stack, separator and drier, arrestor, tank, regulator, fuel cell
Tank 2.00 L internal, OD 110, wall 3, straight 201; four M10 guard rods on a 156 square
Working 300 kPa g; supply cut 310 kPa g; relief 325 kPa g
Relief and vent lines 6 OD to a hanger under the canopy
Vent needle valve: 300 to 20 kPa g in 3 min or more
H2Guard sensor at the canopy high point beside the duct
Fuel cell supply about 50 kPa g; 12 W class, 75 x 47 x 70
Four posts and a top frame carry the canopy and panel
Mass about 28.0 kg (HBN-CAL-001); H2Guard costed separately
PRELIMINARY, NOT FOR FABRICATION
