WHERE IT GOES
This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut two 70 mm lengths of 40 x 20 x 3 angle; deburr.

Upright 40 mm leg: two 6.5 mm holes 30 mm up from the deck, 25 mm each side of the middle, for M6 screws into the stack's end-plate mounting holes (confirm the holes on the part).

Flat 20 mm leg: two 5.5 mm holes 11.5 mm out from the end plate face, 25 mm each side of the middle, for 5 mm deck screws.

Fit: the upright leg bolts flat to the outside face of an end plate, below the lower tie rods; the flat leg points outward and screws to the deck. The stack's base is 20 mm above the deck.

Check: the stack stands level and does not rock.
