WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut the sheet to 900 x 345 mm; keep the film on while working.

Duct hole 106 mm diameter, centre on the middle line, 240 mm back from the front edge. Cut with a hole saw at low speed.

Screw holes 6 mm (oversize for heat movement), 10 mm in from the edges: front and back at 110 and 330 mm each side of the middle; each side 120 and 220 mm back from the front edge.

Hanger holes: two 4.5 mm, 93 mm back from the front edge, 150 and 200 mm right of the middle.

Fit: lies on the top frame; M5 screws with large washers.

Duct collar: bought 100 mm flanged spigot through the hole, flange on top, four M4 screws and a silicone bead.

Check: no cracks from any hole; the sheet lies flat.
